The Van Medevoort DD5.2. Revolutionary loudspeaker system designed as small compact monitor for the reproduction of analog and digital audio recordings, for stereo and multi-channel. Van Medevoort Audio meets the almost impossible consumer and professional desire for a compact speaker system with minimal dimensions and the maximum sound quality of large speakers. This is possible by using the unique vM Anti-Resonance technology, specially designed speaker systems for this system and using the very best audiophile components in the cross-over filters and correction networks. The internal wiring is of course performed with the famous vM Silver Wire. A small modern stylized system with a great sound.
